

When do you need an environmental inspection?

1. To comply to EPA and OSHA regulations in your industry or facility.
2. Prior to the demolition of a building.
3. Prior to the renovation of a structure or facility.
4. For a property or vacant land ownership transfer.
5. In response to employee or tenant concerns/complaints.
6. In response to a notice of violation of environmental laws.
7. To document the completion of an abatement or decontamination.
8. In response to a hazardous or regulated materials release.
9. Verifying the healthiness of a workplace or home.
10. To meet banking or insurance requirements.
11. In response to possible workman's compensation cases.

Remember when choosing an environmental professional:

The bitterness of poor quality remains long after the sweetness of the lowest price is forgotten.

REIS

RHOADES ENVIRONMENTAL

Experience:

I have over 17 years experience in the construction industry and 15 years of experience in the field of environmental inspection and consulting services. In that time, having performed over 1000 environmental inspections on commercial, industrial, manufacturing, vacant, and residential properties in over 12 different states.

How can we help you?

Rhoades Environmental currently holds a \$2,000,000.00 Errors & Omissions (E&O) and General Liability Insurance policy for all environmental work performed for you. Due to my experience working with large and small clients, I understand the various problems you may encounter with different environmental compliance issues and contaminate inspection/sampling requirements. Take advantage of my practical knowledge in the environmental industry and my experience in providing environmental inspections and consulting services you may require in today's market place at a competitive price.

Rhoades Environmental can provide you with regulatory compliant, awareness, and informational training for a variety of environmental, EPA, or OSHA issues. I am an approved environmental trainer for EPA Region 6 and EPA Region 9 with over 10 years experience in environmental training. I have completed various training courses for the Southwestern Indian Polytechnic Institute (SIPI), University of Texas–Arlington, and the University of New Mexico–Continuing Education environmental training program when it was active.

Advice over the phone is always available at no cost to you. Call my office to discuss your particular situation and let us help you outline your options and the associated costs.
